Dear Rebekah,

I have just received the 12 month anniversary fuel analysis and was delighted to see your system has achieved the 33% reduction pledged in fact we have actually had a 41% reduction in kWh and within one of the coldest winters on record for some time.

The project was made easier to approve in view of the guarantee which of course protected our investment and importantly the reduction of 145.49 tonnes of CO₂ which in light of increasing fuel costs was extremely welcome. It's good to see a product that actually delivers over and above its initial pledge, and to work with a supplier who exceeded in their promises.

In view of the results I would have no hesitation in recommending the Vickers Energy Management system to companies looking invest money on Energy Saving equipment for their industrial heating.

Best regards,

Bob Bell
Facilities Manager
