Dear Amanda,

Now we have Vickers energy management systems controlling the heating at all our Garden Centres I thought it time to drop you a line to detail our results to date.

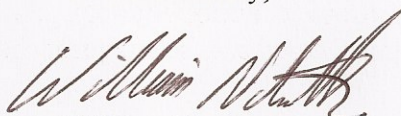

We fitted your systems into two garden centres sites in April 2007 and their gas consumption for heating was monitored and compared with the usage beforehand. The results were in excess of your expectations.

The next stage was with our acquisition of six garden centre sites in the North West – they already had Vickers systems and had again proven experience of delivering savings.

Based on the analysis of these installations, we then installed your systems at our remaining garden centre sites, and the monitoring of those over the first few months has been very positive. As a direct consequence of the reduction in consumption it looks like we will have reduced our CO₂ emissions by over 340 tonnes per year. Not only are the Vickers systems proving of great commercial benefit at our nineteen garden centres, but they are aiding us in our commitment to the Environment.

I would like to thank you and your back-up team for the support we've had during the installation and with the after sales monitoring process.

Yours sincerely,

William Notcutt
Deputy Chairman
