Friday 11th April, 2014

Malcolm,

Thanks for popping in yesterday, and just to confirm how pleased we are with the Vickers energy system you fitted for us last October.

The system controls our Benson oil fired warm air heaters, you pledged a consumption reduction of 20% and the reality is that the system has cut our oil consumption by 29%.

In summary, we're very pleased with the system, and also with the service – you promised to keep in touch to check all is well and the system is performing, and everything has gone as you said it would.

I would be happy to recommend you and the Vickers system,

Yours sincerely,

Fraser MacKellar
Director
