Dear Sir

I would like take this opportunity of thanking your company for the professional way in which they carried the installation of our new management system.

We installed our Vickers Energy Management System in December, right in the middle of the heating season, the results were monitor closely over the first three month to the end of March, when compared to the same period as last year it showed a remarkable 40 percent reduction in our gas consumption
Therefore with these savings it will give us a pay back period of just over one year.

Yours Faithfully

George Ramage

Plant Engineering Manager
