Dear Malcolm,

A few words of praise for you; after reviewing the performance of the Vickers energy management system you installed to control the gas fired radiant heating, the warm air heaters and boilers at our Newport Transport Depot I am very impressed.

You promised us a 30% reduction in our gas consumption – you delivered a reduction of just over 50%, halving our costs and reducing our CO₂ emissions by 216 tonnes per year, which is important to us as we are committed to reducing our impact on the environment.

I would recommend your system to any other organisation wishing to reduce energy usage, and the recommendation is not just for the savings you deliver, but also the back up service from your team.

Yours sincerely,

David Jenkins
Finance Director
